

# ATTENTION

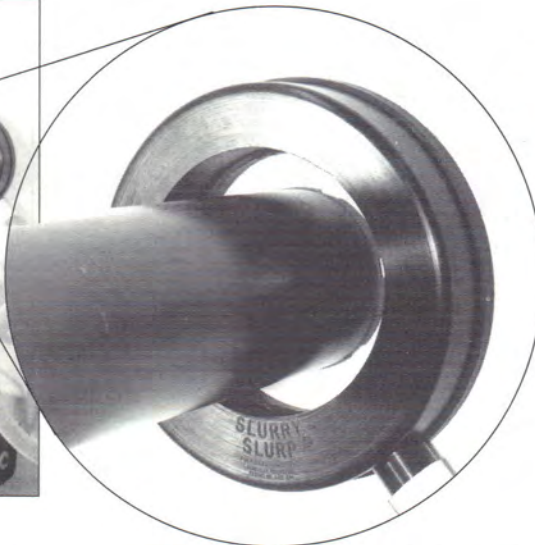

CONCRETE CORERS AND DRILLERS...

## *Less Mess with Slurry Slurp*<sup>®</sup>

**Save costly wasted time of clean up on concrete walls or floors  
It will pay for itself within the first few holes drilled!**

A typical **SLURRY SLURP** installation on a coring drill using a standard shop vacuum.

**SLURRY SLURP** self grips to a wall during drilling.  
No installation hardware needed.

How much time and money is wasted cleaning up stains after a core drilling operation?  
*Time that could be used making money on the next hole?*

**Slurry Slurp** prevents leaks and stains BEFORE they happen—and makes you more productive on the job!

- Molded from a durable polymer for **trouble-free** maintenance.
- Patented design allows the **SLURRY SLURP** to be self-attaching to concrete walls (with over 35 lbs. of force) and floors using only the suction from a wet/dry vacuum. No other attachment hardware is needed. **Attaches in seconds.**
- Supplied in two sizes for drilling holes up to 10 inches.

Drill faster and cleaner with **SLURRY SLURP**. Join the many satisfied users of **SLURRY SLURP**. See your dealer today or call directly to:

The SLURRY SLURP is a patented shop vacuum attachment that has been engineered to contain and remove the dust, water, and slurry created during concrete drilling. The SLURRY SLURP is manufactured as one molded piece and comes complete with vacuum hose and has no additional rings or attachments to lose or break

The SLURRY SLURP is available in two sizes:  
5 inch model for core bits up through 5 inches  
10 inch model for core bits from 5 to 10 inches.

## SLURRY SLURP is the perfect solution to a messy problem.

- **Contains and removes water and slurry generated during core drilling. Prevents staining of walls and floors.**
- **Saves at least 10 to 15 minutes on every hole cut.**
- **Installs in seconds-Just connect it to your wet/dry vacuum.**
- **Delivered complete with 10 feet of special vacuum hose-no additional tools are needed.**

### *This is what our customers say...*

"We have been using the 'Slurry Slurp' for the past two years. We have found it is the best device we have ever used to contain and pick up water.

It took some time in the beginning to get our operators to use the 'Slurps'. Now they will use nothing else. We found on drilling walls, where water control is necessary, that we can eliminate one person (for water control) and send a single driller.

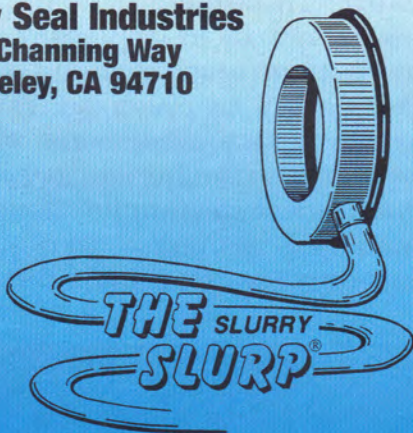

The product is almost indestructible and will last for years under regular use. It is a pleasure to use a product that lives up to its advertising."

Very truly yours,  
East Coast Concrete Cutting Co., Inc.  
Mickey Hogan
